

CRIMPING TOOL CT15

Description.

Hand held manual operated triple jaw crimping tool with ratchet mechanism for complete controlled crimp cycle, for use with standard pre-insulated red, blue & yellow terminals. Can be supplied with calibration certificate if required.

Features.

High precision cast jaw set for optimum compression.

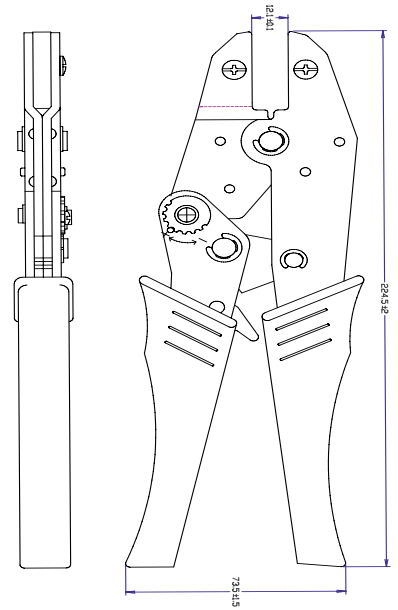

Ratchet control mechanism ensures precise controlled crimping cycle.

Emergency release lever for detachment of ratchet control during crimp cycle.

Automatic opening of crimp tool on completion of crimp cycle.

Calibration / load adjustment device.

Ergonomically designed moulded plastic handles for reduction of operator fatigue.

Application.

For the crimping of pre-insulated terminals from 0.5mm to 6mm/sq. meets the compression ratio requirements of BSEN 60352-2:2006 and BS 5G178:1992.

Material specification.

Jaw set: Carbon steel grade SCM440

Frame: Material steel grade S45C

Handles: PP
